Intel® Pentium® 4 LGA775 Processor Motherboard

User's Manual

Rev. 2002
12ME-8I865GTG-2002R

Declaration of Conformity
We, Manufacturer/Importer
(full address)

G.B.T. Technology Trading GMbH
Ausschlager Weg 41, 1F 20537 Hamburg, Germany

declare that the product
(description of the apparatus, system, installation to which it refers)

Motherboard
GA-8I865G775-G
is in conformity with
(reference to the specification under which conformity is declared)
in accordance with 89/336 EEC-EMC Directive

☐ EN 55011	Limits and methods of measurement of radio disturbance characteristics of industrial, scientific and medical (ISM) high frequency equipment	☒ EN 61000-3-2 Disturbances in supply systems caused by household appliances and similar electrical equipment "Voltage fluctuations"
		☒ EN 61000-3-3
☐ EN 55013	Limits and methods of measurement of radio disturbance characteristics of broadcast receivers and associated equipment	☒ EN 55024 Information Technology equipment-Immunity characteristics-Limits and methods of measurement
☐ EN 55014-1	Limits and methods of measurement of radio disturbance characteristics of household electrical appliances, portable tools and similar electrical apparatus	☐ EN 50082-1 Generic immunity standard Part 1: Residual, commercial and light industry
		☐ EN 50082-2 Generic immunity standard Part 2: Industrial environment
☐ EN 55015	Limits and methods of measurement of radio disturbance characteristics of fluorescent lamps and luminaries	☐ EN 55014-2 Immunity requirements for household appliances tools and similar apparatus
☐ EN 55020	Immunity from radio interference of broadcast receivers and associated equipment	☐ EN 50091-2 EMC requirements for uninterruptible power systems (UPS)
☒ EN 55022	Limits and methods of measurement of radio disturbance characteristics of information technology equipment	
☐ DIN VDE 0855 ☐ part 10 ☐ part 12	Cabled distribution systems; Equipment for receiving and/or distribution from sound and television signals	
☒ CE marking		CE (EC conformity marking)

The manufacturer also declares the conformity of above mentioned product with the actual required safety standards in accordance with LVD 73/23 EEC

☐ EN 60065	Safety requirements for mains operated electronic and related apparatus for household and similar general use	☐ EN 60950 Safety for information technology equipment including electrical business equipment
☐ EN 60335	Safety of household and similar electrical appliances	☐ EN 50091-1 General and Safety requirements for uninterruptible power systems (UPS)

Manufacturer/Importer

Signature : *Timmy Huang*

Name : Timmy Huang

(Stamp)   Date : Apr. 18, 2006

DECLARATION OF CONFORMITY
Per FCC Part 2 Section 2.1077(a)

FC

Responsible Party Name: G.B.T. INC. (U.S.A.)

Address: 17358 Railroad Street
City of Industry, CA 91748

Phone/Fax No: (818) 854-9338/ (818) 854-9339

hereby declares that the product

Product Name: Motherboard

Model Number: GA-8I865G775-G

Conforms to the following specifications:

FCC Part 15, Subpart B, Section 15.107(a) and Section 15.109
(a).Class B Digital Device

Supplementary Information:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful and (2) this device must accept any inference received, including that may cause undesired operation.

Representative Person's Name: ERIC LU

Signature: *Eric Lu*

Date: Apr. 18, 2006

Product Manual Classification

In order to assist in the use of this product, Gigabyte has categorized the user manual in the following:

- ■ For quick installation, please refer to the "Hardware Installation Guide" included with the product.

- ■ For detailed product information and specifications, please carefully read the "User's Manual."

- ■ For detailed information related to Gigabyte's unique features, please go to the "Technology Guide" section on Gigabyte's website to read or download the information you need.

For more product details, please visit Gigabyte's website at www.gigabyte.com.tw

Table of Contents

Item Checklist

☑ IDE Cable x 1
☑ FDD Cable x 1
☑ Serial ATA Cable x 1
☑ I/O Shield

* The items listed above are for reference only, and are subject to change without notice.
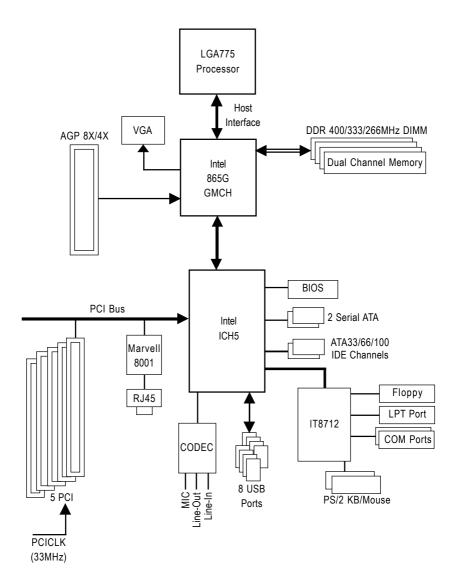

Optional Accessories

◆ 2 Ports USB2.0 Cable (Part Number: 12CR1-1UB030-51/-51R)
◆ COM Port Cable (Part Number: 12CF1-1CM001-31/-31R)

GA-8I865G775-G(-RH) Motherboard Layout

Block Diagram

Chapter 1 Hardware Installation

1-1   Considerations Prior to Installation

Preparing Your Computer

The motherboard contains numerous delicate electronic circuits and components which can become damaged as a result of electrostatic discharge (ESD). Thus, prior to installation, please follow the instructions below:

1.   Please turn off the computer and unplug its power cord.
2.   When handling the motherboard, avoid touching any metal leads or connectors.
3.   It is best to wear an electrostatic discharge (ESD) cuff when handling electronic components (CPU, RAM).
4.   Prior to installing the electronic components, please have these items on top of an antistatic pad or within a electrostatic shielding container.
5.   Please verify that the power supply is switched off before unplugging the power supply connector from the motherboard.

Installation Notices

1.   Prior to installation, please do not remove the stickers on the motherboard. These stickers are required for warranty validation.
2.   Prior to the installation of the motherboard or any hardware, please first carefully read the information in the provided manual.
3.   Before using the product, please verify that all cables and power connectors are connected.
4.   To prevent damage to the motherboard, please do not allow screws to come in contact with the motherboard circuit or its components.
5.   Please make sure there are no leftover screws or metal components placed on the motherboard or within the computer casing.
6.   Please do not place the computer system on an uneven surface.
7.   Turning on the computer power during the installation process can lead to damage to system components as well as physical harm to the user.
8.   If you are uncertain about any installation steps or have a problem related to the use of the product, please consult a certified computer technician.

Instances of Non-Warranty

1.   Damage due to natural disaster, accident or human cause.
2.   Damage as a result of violating the conditions recommended in the user manual.
3.   Damage due to improper installation.
4.   Damage due to use of uncertified components.
5.   Damage due to use exceeding the permitted parameters.
6.   Product determined to be an unofficial Gigabyte product.

1-2 Feature Summary

CPU	◆ Supports LGA775 Intel® Processor Pentium® 4[Note 1]
	◆ L2 cache varies with CPU
Front Side Bus	◆ Supports 800/533MHz FSB
Chipset	◆ Northbridge:Intel® 865G
	◆ Southbridge: Intel® ICH5
LAN	◆ Onboard Marvell 8001 chip(10/100/1000Mbit)
Audio	◆ Onboard ALC653 chip
	◆ Supports 2 / 4 / 6 channel audio
	◆ Supports CD In connection
	◆ Supports AUX In connection
	◆ Supports SPDIF Out connection
Storage	◆ Intel® ICH5 Southbrigde
	- 1 FDD connector, allowing connection of 2 FDD devices
	- 2 IDE connectors (IDE1/IDE2) with UDMA 33/ATA 66/ATA 100 support, allowing connection of 4 IDE devices
	- 2 SATA connectors (SATA0/SATA1), allowing connection of 2 SATA devices
O.S Support	◆ Microsoft Windows 2000/XP
Memory	◆ 4 DDR DIMM memory slots (supports up to 4GB memory) [Note 2]
	◆ Supports dual channel DDR400/333/266 DIMM
	◆ Supports 2.5V DDR DIMMs
Expanstion Slots	◆ 1 AGP slot 4X/8X (1.5V)
	◆ 5 PCI slots
Internal Connectors	◆ 1 20-pin ATX power connector
	◆ 1 4-pin ATX 12V power connector
	◆ 1 floppy connector
	◆ 2 IDE connectors
	◆ 2 SATA connectors
	◆ 1 CPU fan connector
	◆ 1 system fan connector
	◆ 1 front panel connector
	◆ 1 front audio connector
	◆ 1 COMB connector
	◆ 1 CD In connector
	◆ 1 AUX In connector
	◆ 1 Surround Center connector
	◆ 1 SPDIF Out connector
	◆ 1 power LED connector
	◆ 2 USB 2.0/1.1 connectors for additional 4 ports by cables

Rear Panel I/O	◆ 1 PS/2 keyboard port
	◆ 1 PS/2 mouse port
	◆ 1 parallel port
	◆ 1 serial port (COMA)
	◆ 1 VGA port
	◆ 4 USB 2.0/1.1 ports
	◆ 1 RJ-45 port
	◆ 3 audio jacks (Line In / Line Out / MIC In)
I/O Control	◆ IT8712 chip
Hardware Monitor	◆ System voltage detection
	◆ CPU temperature detection
	◆ CPU / System fan speed detection
	◆ CPU warning temperature
	◆ CPU System fan failure warning
	◆ CPU smart fan control
BIOS	◆ 1 4Mbit flash ROM
	◆ Use of licensed AWARD BIOS
Additional Features	◆ Supports @BIOS
	◆ Supports Download Center
	◆ Supports Q-Flash
	◆ Supports EasyTune (only supports Hardware Monitor function)(Note 3)
	◆ Supports Xpress Install
	◆ Supports Xpress Recovery2
	◆ Supports Xpress Rescue
Bundle Software	◆ Norton Internet Security (OEM version)
Form Factor	◆ ATX form factor; 30.5cm x 21cm

(Note 1) For further CPU support information, please go to GIGABYTE's website.
(Note 2) Due to standard PC architecture, a certain amount of memory is reserved for system usage and therefore the actual memory size is less than the stated amount.
For example, 4 GB of memory size will instead be shown as 3.xxGB memory during system startup.
(Note 3) EasyTune functions may vary depending on different motherboards.

1-3 Installation of the CPU and Heatsink

CAUTION

Before installing the CPU, please comply with the following conditions:

1. Please make sure that the motherboard supports the CPU.
2. Please take note of the one indented corner of the CPU. If you install the CPU in the wrong direction, the CPU will not insert properly. If this occurs, please change the insert direction of the CPU.
3. Please add an even layer of heat sink paste between the CPU and heatsink.
4. Please make sure the heatsink is installed on the CPU prior to system use, otherwise overheating and permanent damage of the CPU may occur.
5. Please set the CPU host frequency in accordance with the processor specifications. It is not recommended that the system bus frequency be set beyond hardware specifications since it does not meet the required standards for the peripherals. If you wish to set the frequency beyond the proper specifications, please do so according to your hardware specifications including the CPU, graphics card, memory, hard drive, etc.

NOTE

HT functionality requirement content :

Enabling the functionality of Hyper-Threading Technology for your computer system requires all of the following platform components:

- CPU: An Intel® Pentium 4 Processor with HT Technology
- Chipset: An Intel® Chipset that supports HT Technology
- BIOS: A BIOS that supports HT Technology and has it enabled
- OS: An operation system that has optimizations for HT Technology

1-3-1 Installation of the CPU

Metal Lever
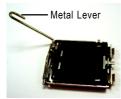

Fig. 1
Gently lift the metal lever located on the CPU socket to the upright position.

Fig. 2
Remove the plastic covering on the CPU socket.
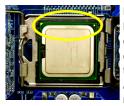

Fig. 3
Notice the small gold colored triangle lo- cated on the edge of the CPU socket. Align the indented cor- ner of the CPU with the triangle and gently insert the CPU into position. (Grasping the CPU firmly between your thumb and forefinger, carefully place it into the socket in a straight and downwards motion. Avoid twisting or bending motions that might cause damage to the CPU during installation.)
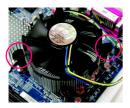

Fig. 4
Once the CPU is properly inserted, please replace the plastic covering and push the metal lever back into its original position.

1-3-2   Installation of the Heatsink
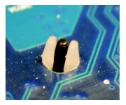

Fig.1
Please apply an even layer of heatsink paste on the surface of the installed CPU.

Male Push Pin

The top of Female Push Pin

Female Push Pin

Fig. 2
(Turning the push pin along the direction of arrow is to remove the heatsink, on the contrary, is to install.)
Please note the direction of arrow sign on the male push pin doesn't face inwards before installation. (This instruction is only for Intel boxed fan)
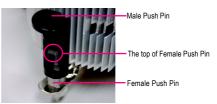

Fig. 3
Place the heatsink atop the CPU and make sure the push pins aim to the pin hole on the motherboard.Pressing down the push pins diagonally.

Fig. 4
Please make sure the Male and Female push pin are joined closely. (for detailed installation instructions, please refer to the heatsink installation section of the user manual)

Fig. 5
Please check the back of motherboard after installing. If the push pin is inserted as the picture, the installation is complete.

Fig. 6
Finally, please attach the power connector of the heatsink to the CPU fan header located on the motherboard.

NOTE
The heatsink may adhere to the CPU as a result of hardening of the heatsink paste.To prevent such an occurrence, it is suggested that either thermal tape rather than heat sink paste be used for heat dissipation or using extreme care when removing the heatsink.
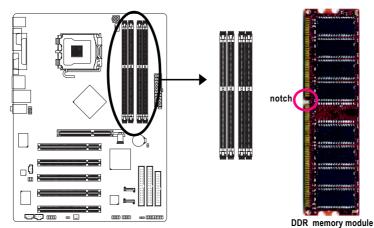

1-4 Installation of Memory

⚠️ **CAUTION**

Before installing the memory modules, please comply with the following conditions:

1. Please make sure that the memory used is supported by the motherboard. It is recommended that memory of similar capacity, specifications and brand be used.
2. Before installing or removing memory modules, please make sure that the computer power is switched off to prevent hardware damage.
3. Memory modules have a foolproof insertion design. A memory module can be installed in only one direction. If you are unable to insert the module, please switch the direction.

The motherboard supports DDR memory modules, whereby BIOS will automatically detect memory capacity and specifications. Memory modules are designed so that they can be inserted only in one direction. The memory capacity used can differ with each slot.

notch

DDR memory module

Fig.1

The DIMM socket has a notch, so the DIMM memory module can only fit in one direction. Insert the DIMM memory module vertically into the DIMM socket. Then push it down.

Fig. 1

Fig.2

Close the plastic clip at both edges of the DIMM sockets to lock the DIMM module.

Reverse the installation steps when you wish to remove the DIMM module.

Fig. 2

1-5   Installation of Expansion Cards

You can install your expansion card by following the steps outlined below:

1.   Read the related expansion card's instruction document before installing the expansion card into the computer.
2.   Remove your computer's chassis cover, screws and slot bracket from the computer.
3.   Press the expansion card firmly into expansion slot in motherboard.
4.   Be sure the metal contacts on the card are indeed seated in the slot.
5.   Replace the screw to secure the slot bracket of the expansion card.
6.   Replace your computer's chassis cover.
7.   Power on the computer, if necessary, setup BIOS utility of expansion card from BIOS.
8.   Install related driver from the operating system.
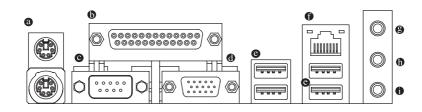

Installing a AGP expansion card:

⚠
CAUTION

Please carefully pull out the small white-drawable bar at the end of the AGP slot when you try to install/uninstall the VGA card. Please align the VGA card to the onboard AGP slot and press firmly down on the slot. Make sure your VGA card is locked by the small white-drawable bar.

1-6   I/O Back Panel Introduction

ⓐ **PS/2 Keyboard and PS/2 Mouse Connector**

To install a PS/2 port keyboard and mouse, plug the mouse to the upper port (green) and the keyboard to the lower port (purple).

ⓑ **Parallel Port**

The parallel port allows connection of a printer, scanner and other peripheral devices.

ⓒ **Serial Port (COMA)**

Devices like mouses, modems, and etc. can be connected to Serial port.

ⓓ **VGA Port**

Monitor can be connected to VGA port.

ⓔ **USB port**

Before you connect your device(s) into USB connector(s), please make sure your device(s) such as USB keyboard, mouse, scanner, zip, speaker...etc. have a standard USB interface. Also make sure your OS supports USB controller. If your OS does not support USB controller, please con-tact OS vendor for possible patch or driver upgrade. For more information please contact your OS or device(s) vendors.

ⓕ **LAN Port**

The LAN port provides Internet connection.

ⓖ **Line In**

Devices like CD-ROM, walkman etc. can be connected to Line In jack.

ⓗ **Line Out**

Connect the stereo speakers, earphone or front surround speakers to this connector.
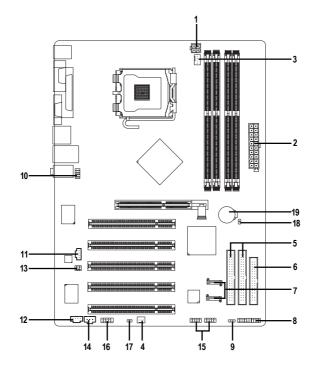

ⓘ **MIC In**

Microphone can be connected to MIC In jack.

 You can use audio software to configure 2-/4-/6- channel audio functioning.

1-7   Connectors Introduction

1)	**ATX_12V**	11)	**CD_IN**
2)	**ATX (Power Connector)**	12)	**AUX_IN**
3)	**CPU_FAN**	13)	**SUR_CEN**
4)	**SYS_FAN**	14)	**SPDIF_O**
5)	**IDE1 / IDE2**	15)	**F_USB1 / F_USB2**
6)	**FDD**	16)	**COMB**
7)	**SATA0 / SATA1**	17)	**CI**
8)	**F_PANEL**	18)	**CLR_CMOS**
9)	**PWR_LED**	19)	**BAT**
10)	**F_AUDIO**		
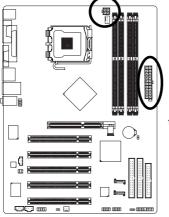

1/2) ATX_12V/ATX (Power Connector)
With the use of the power connector, the power supply can supply enough stable power to all the components on the motherboard. Before connecting the power connector, please make sure that all components and devices are properly installed. Align the power connector with its proper location on the motherboard and connect tightly.

The ATX_12V power connector mainly supplies power to the CPU. If the ATX_12V power connector is not connected, the system will not start.

Caution!

Please use a power supply that is able to handle the system voltage requirements. It is recommended that a power supply that can withstand high power consumption be used (300W or greater). If a power supply is used that does not provide the required power, the result can lead to an unstable system or a system that is unable to start.

If you use a 24-pin ATX power supply, please remove the small cover on the power connector on the motherboard before plugging in the power cord ; Otherwise, please do not remove it.

Pin No.	Definition

19	+5V
20	+5V

3/4) CPU_FAN / SYS_FAN (Cooler Fan Power Connector)

The cooler fan power connector supplies a +12V power voltage via a 3-pin/4-pin (only for CPU_FAN) power connector and possesses a fool-proof connection design.
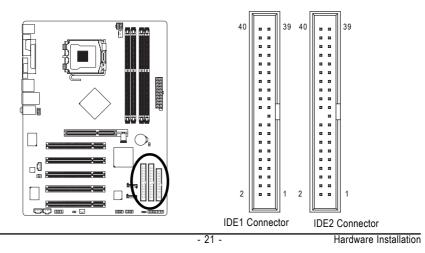

Most coolers are designed with color-coded power connector wires. A red power connector wire indicates a positive connection and requires a +12V power voltage. The black connector wire is the ground wire (GND).

Remember to connect the CPU/system fan cable to the CPU_FAN/SYS_FAN connector to prevent CPU damage or system hanging caused by overheating.

CPU_FAN

SYS_FAN

Pin No.	Definition
1	GND
2	+12V
3	Sense
4	Speed Control (Only for CPU_FAN)
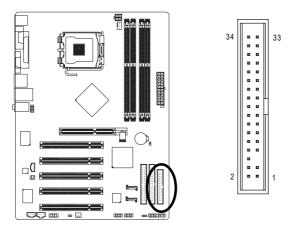

5) IDE1/IDE2 (IDE Connector)

An IDE device connects to the computer via an IDE connector. One IDE connector can connect to one IDE cable, and the single IDE cable can then connect to two IDE devices (hard drive or optical drive). If you wish to connect two IDE devices, please set the jumper on one IDE device as Master and the other as Slave (for information on settings, please refer to the instructions located on the IDE device). Before attaching the IDE cable, please take note of the foolproof groove in the IDE connector.

IDE1 Connector   IDE2 Connector

- 21 -   Hardware Installation
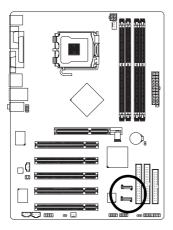

6) FDD (FDD Connector)

The FDD connector is used to connect the FDD cable while the other end of the cable connects to the FDD drive. The types of FDD drives supported are: 360KB, 720KB, 1.2MB, 1.44MB and 2.88MB. Before attaching the FDD cable, please take note of the foolproof groove in the FDD connector.

34   33

2   1

7) SATA0/SATA1 (Serial ATA Connector,)

Serial ATA can provide up to 150MB/s transfer rate. Please refer to the BIOS setting for the Serial ATA and install the proper driver in order to work properly.

3	MPD-

10) F_AUDIO (Front Audio Panel Connector)
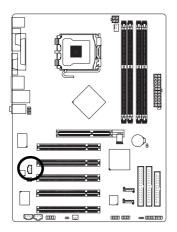

If you want to use Front Audio connector, you must remove 5-6, 9-10 Jumper. In order to utilize the front audio header, your chassis must have front audio connector. Also please make sure the pin assigments on the cable are the same as the pin assigments on the MB header. To find out if the chassis you are buying support front audio connector, please contact your dealer.Please note, you can have the alternative of using front audio connector or of using rear audio connector to play sound.

6	BASS_OUT

14) SPDIF_O (SPDIF Out)
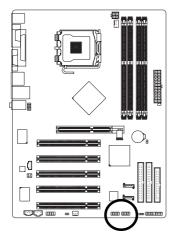

The SPDIF output is capable of providing digital audio to external speakers or compressed AC3 data to an external Dolby Digital Decoder. Use this feature only when your stereo system has digital input function. Be careful with the polarity of the SPDIFO connector. Check the pin assignment carefully while you connect the SPDIFO cable. Incorrect connection between the cable and connector will make the device unable to work or even damage it. For optional SPDIFO cable, please contact your local dealer.

Pin No.	Definition

8	NCTSB-
9	NRIB-
10	No Pin

17) CI (Chassis Intrusion, Case Open)
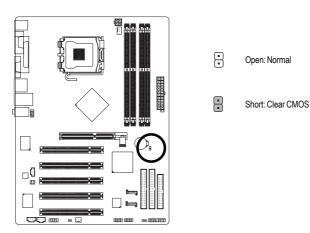

This 2-pin connector allows your system to detect if the chassis cover is removed. You can check the "Case Opened" status in BIOS Setup.

1 ▢▢
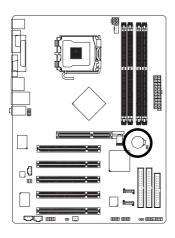

Pin No.	Definition
1	Signal
2	GND
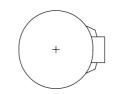

18) CLR_CMOS (Clear CMOS)

You may clear the CMOS data to its default values by this header. To clear CMOS, temporarily short the two pins. Default doesn't include the jumper to avoid improper use of this header.

Open: Normal

Short: Clear CMOS

19) BAT (Battery)

❖ Danger of explosion if battery is incorrectly replaced.

❖ Replace only with the same or equivalent type recommended by the manufacturer.

❖ Dispose of used batteries according to the manufacturer's instructions.

If you want to erase CMOS...

1. Turn OFF the computer and unplug the power cord.
2. Take out the battery gently and put it aside for about 1 minute (Or you can use a metal object to connect the positive and negative pins in the battery holder to make them short for 5 seconds).
3. Re-install the battery.
4. Plug the power cord and turn ON the computer.

Chapter 2 BIOS Setup

BIOS (Basic Input and Output System) includes a CMOS SETUP utility which allows user to configure required settings or to activate certain system features.

The CMOS SETUP saves the configuration in the CMOS SRAM of the motherboard.

When the power is turned off, the battery on the motherboard supplies the necessary power to the CMOS SRAM.

When the power is turned on, pushing the <Del> button during the BIOS POST (Power-On Self Test) will take you to the CMOS SETUP screen. You can enter the BIOS setup screen by pressing "Ctrl + F1".

When setting up BIOS for the first time, it is recommended that you save the current BIOS to a disk in the event that BIOS needs to be reset to its original settings. If you wish to upgrade to a new BIOS, either GIGABYTE's Q-Flash or @BIOS utility can be used.

Q-Flash allows the user to quickly and easily update or backup BIOS without entering the operating system. @BIOS is a Windows-based utility that does not require users to boot to DOS before upgrading BIOS but directly download and update BIOS from the Internet.

CONTROL KEYS

<↑><↓><←><→>	Move to select item
<Enter>	Select Item
<Esc>	Main Menu - Quit and not save changes into CMOS Status Page Setup Menu and Option Page Setup Menu - Exit current page and return to Main Menu
<Page Up>	Increase the numeric value or make changes
<Page Down>	Decrease the numeric value or make changes
<F1>	General help, only for Status Page Setup Menu and Option Page Setup Menu
<F2>	Item Help
<F5>	Restore the previous CMOS value from CMOS, only for Option Page Setup Menu
<F6>	Load the file-safe default CMOS value from BIOS default table
<F7>	Load the Optimized Defaults
<F8>	Q-Flash utility
<F9>	System Information
<F10>	Save all the CMOS changes, only for Main Menu

Main Menu

The on-line description of the highlighted setup function is displayed at the bottom of the screen.

Status Page Setup Menu / Option Page Setup Menu

Press <F1> to pop up a small help window that describes the appropriate keys to use and the possible selections for the highlighted item. To exit the Help Window press <Esc>.
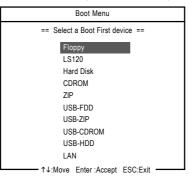

Because BIOS flashing is potentially risky, please do it with caution and avoid inadequate operation that may result in system malfunction.

CAUTION

<F12> : For Boot Menu

Select boot sequence for onboard (or add-on cards) device.

```

The Main Menu (For example: BIOS Ver. : D11)

Once you enter Award BIOS CMOS Setup Utility, the Main Menu (as figure below) will appear on the screen. Use arrow keys to select among the items and press <Enter> to accept or enter the sub-menu.

CMOS Setup Utility-Copyright (C) 1984-2006 Award Software	
▶ Standard CMOS Features	Load Fail-Safe Defaults
▶ Advanced BIOS Features	Load Optimized Defaults
▶ Integrated Peripherals	Set Supervisor Password
▶ Power Management Setup	Set User Password
▶ PnP/PCI Configurations	Save & Exit Setup
▶ PC Health Status	Exit Without Saving
▶ MB Intelligent Tweaker(M.I.T.)	
ESC: Quit	↑↓→←: Select Item
F8: Q-Flash	F10: Save & Exit Setup
Time, Date, Hard Disk Type...	

> If you can't find the setting you want, please press "Ctrl+F1" to search the advanced option hidden.
>
> **NOTE** Please Load Optimized Defaults in the BIOS when somehow the system works not stable as usual. This action makes the system reset to the default for stability.
>
> The BIOS Setup menus described in this chapter are for reference only and may differ from the exact settings for your motherboard.

■ **Standard CMOS Features**

This setup page includes all the items in standard compatible BIOS.

■ **Advanced BIOS Features**

This setup page includes all the items of Award special enhanced features.

■ **Integrated Peripherals**

This setup page includes all onboard peripherals.

■ **Power Management Setup**

This setup page includes all the items of Green function features.

■ **PnP/PCI Configuration**

This setup page includes all the configurations of PCI & PnP ISA resources.

■ **PC Health Status**

This setup page is the System auto detect Temperature, voltage, fan, speed.

■ **MB Intelligent Tweaker(M.I.T.)**

This setup page is control CPU clock and frequency ratio.

■ **Load Fail-Safe Defaults**

Fail-Safe Defaults indicates the value of the system parameters which the system would be in safe configuration.

■ **Load Optimized Defaults**

Optimized Defaults indicates the value of the system parameters which the system would be in best performance configuration.

■ **Set Supervisor Password**

Change, set, or disable password. It allows you to limit access to the system and Setup, or just to Setup.

■ **Set User Password**

Change, set, or disable password. It allows you to limit access to the system.

■ **Save & Exit Setup**

Save CMOS value settings to CMOS and exit setup.

■ **Exit Without Saving**

Abandon all CMOS value changes and exit setup.

2-1   Standard CMOS Features

```

☞ **Date**

The date format is <week>, <month>, <day>, <year>.

- ▶ Week   The week, from Sun to Sat, determined by the BIOS and is display only
- ▶ Month   The month, Jan. Through Dec.
- ▶ Day   The day, from 1 to 31 (or the maximum allowed in the month)
- ▶ Year   The year, from 1999 through 2098

☞ **Time**

The times format in <hour> <minute> <second>. The time is calculated base on the 24-hour military-time clock. For example, 1 p.m. is 13:00:00.

☞ **IDE Channel 0 Master/Slave ; IDE Channel 1 Master/Slave**

- ▶ IDE HDD Auto-Detection Press "Enter" to select this option for automatic device detection.
- ▶ IDE Channel 0 Master/Slave ; IDE Channel 1 Master/Slave

  IDE devices setup. You can use one of three methods:
    - • Auto   Allows BIOS to automatically detect IDE devices during POST. (Default value)
    - • None   Select this if no IDE devices are used and the system will skip the automatic detection step and allow for faster system start up.
    - • Manual   User can manually input the correct settings.
- ▶ Access Mode Use this to set the access mode for the hard drive. The four options are: CHS/LBA/Large/Auto(default:Auto)
- ▶ Capacity   Capacity of currently installed hard drive.

☞ **IDE Channel 2/3 Master**

- ▶ IDE HDD Auto-Detection Press "Enter" to select this option for automatic device detection.
- ▶ Extended IDE Drive You can use one of the two methods:
    - • Auto   Allows BIOS to automatically detect IDE devices during POST(default)
    - • None   Select this if no IDE devices are used and the system will skip the automatic detection step and allow for faster system start up.
- ▶ Access Mode Use this to set the access mode for the hard drive. The two options are: Large/Auto(default:Auto)

 ▶▶ Capacity   Capacity of currently installed hard drive.

Hard drive information should be labeled on the outside drive casing. Enter the appropriate option based on this information.

 ▶▶ Cylinder   Number of cylinders
 ▶▶ Head   Number of heads
 ▶▶ Precomp   Write precomp
 ▶▶ Landing Zone   Landing zone
 ▶▶ Sector   Number of sectors

☞ **Drive A / Drive B**

The category identifies the types of floppy disk drive A or drive B that has been installed in the computer.

 ▶▶ None   No floppy drive installed
 ▶▶ 360K, 5.25"   5.25 inch PC-type standard drive; 360K byte capacity.
 ▶▶ 1.2M, 5.25"   5.25 inch AT-type high-density drive; 1.2M byte capacity
                      (3.5 inch when 3 Mode is Enabled).
 ▶▶ 720K, 3.5"   3.5 inch double-sided drive; 720K byte capacity
 ▶▶ 1.44M, 3.5"   3.5 inch double-sided drive; 1.44M byte capacity.
 ▶▶ 2.88M, 3.5"   3.5 inch double-sided drive; 2.88M byte capacity.

☞ **Floppy 3 Mode Support (for Japan Area)**

 ▶▶ Disabled   Normal Floppy Drive. (Default value)
 ▶▶ Drive A   Drive A is 3 mode Floppy Drive.
 ▶▶ Drive B   Drive B is 3 mode Floppy Drive.
 ▶▶ Both   Drive A & B are 3 mode Floppy Drives.

☞ **Halt on**

The category determines whether the computer will stop if an error is detected during power up.

 ▶▶ No Errors   The system boot will not stop for any error that may be detected and you
                      will be prompted.
 ▶▶ All Errors   Whenever the BIOS detects a non-fatal error the system will be stopped.
 ▶▶ All, But Keyboard The system boot will not stop for a keyboard error; it will stop for all other
                      errors. (Default value)
 ▶▶ All, But Diskette The system boot will not stop for a disk error; it will stop for all other errors.
 ▶▶ All, But Disk/Key The system boot will not stop for a keyboard or disk error; it will stop for all
                      other errors.

☞ **Memory**

The category is display-only which is determined by POST (Power On Self Test) of the BIOS.

 ▶ **Base Memory**

The POST of the BIOS will determine the amount of base (or conventional) memory installed in the system.

The value of the base memory is typically 512K for systems with 512K memory installed on the motherboard, or 640K for systems with 640K or more memory installed on the motherboard.

 ▶ **Extended Memory**

The BIOS determines how much extended memory is present during the POST.

This is the amount of memory located above 1 MB in the CPU's memory address map.

 ▶ **Total Memory**

This item displays the memory size that used.

2-2   Advanced BIOS Features

" # " System will detect automatically and show up when you install the Intel® Pentium® 4 processor with HT Technology.

☞ **Hard Disk Boot Priority**

Select boot sequence for onboard(or add-on cards) SCSI, RAID, etc.

Use < ↑ > or < ↓ > to select a device, then press<+> to move it up, or <-> to move it down the list. Press <ESC> to exit this menu.

☞ **First / Second / Third Boot Device**

➤ Floppy   Select your boot device priority by Floppy.
➤ LS120   Select your boot device priority by LS120.
➤ Hard Disk   Select your boot device priority by Hard Disk.
➤ CDROM   Select your boot device priority by CDROM.
➤ ZIP   Select your boot device priority by ZIP.
➤ USB-FDD   Select your boot device priority by USB-FDD.
➤ USB-ZIP   Select your boot device priority by USB-ZIP.
➤ USB-CDROM   Select your boot device priority by USB-CDROM.
➤ USB-HDD   Select your boot device priority by USB-HDD.
➤ LAN   Select your boot device priority by LAN.
➤ Disabled   Disable this function.

☞ **Password Check**

➤ System   The system can not boot and can not access to Setup page will be denied if the correct password is not entered at the prompt.
➤ Setup   The system will boot, but access to Setup will be denied if the correct password is not entered at the prompt. (Default value)

(Note)   This item will show up when you install a processor which supports this function.

 CPU Hyper-Threading
  ▸ Enabled   Enables CPU Hyper Threading Feature. Please note that this feature is only
                working for operating system with multi processors mode supported.
                (Default value)
  ▸ Disabled   Disables CPU Hyper Threading.

 Limit CPUID Max. to 3
  ▸ Enabled   Limit CPUID Maximum value to 3 when use older OS like NT4.
  ▸ Disabled   Disables CPUID Limit for windows XP. (Default value)

 No-Execute Memory Protect (Note)
  ▸ Enabled   Enable No-Execute Memory Protect function. (Default value)
  ▸ Disabled   Disable No-Execute Memory Protect function.

 CPU Enhanced Halt (C1E) (Note)
  ▸ Enabled   Enable CPU Enhanced Halt (C1E) function. (Default value)
  ▸ Disabled   Disable CPU Enhanced Halt (C1E) function.

 CPU Thermal Monitor 2 (TM2) (Note)
  ▸ Enabled   Enable CPU Thermal Monitor 2 (TM2) function. (Default value)
  ▸ Disabled   Disable CPU Thermal Monitor 2 (TM2) function.

 CPU EIST Function (Note)
  ▸ Enabled   Enable CPU EIST function. (Default value)
  ▸ Disabled   Disable EIST function.

 On-Chip Frame Buffer Size
  ▸ 1MB   Set on-chip frame buffer size to 1MB.
  ▸ 4MB   Set on-chip frame buffer size to 4MB.
  ▸ 8MB   Set on-chip frame buffer size to 8MB.
  ▸ 16MB   Set on-chip frame buffer size to 16MB. (Default value)
  ▸ 32MB   Set on-chip frame buffer size to 32MB.

(Note)   This item will show up when you install a processor which supports this function.

2-3 Integrated Peripherals

```

```

   On-Chip Primary PCI IDE
    ▶▶ Enabled   Enable onboard 1st channel IDE port. (Default value)
    ▶▶ Disabled   Disable onboard 1st channel IDE port.

   On-Chip Secondary PCI IDE
    ▶▶ Enabled   Enable onboard 2nd channel IDE port. (Default value)
    ▶▶ Disabled   Disable onboard 2nd channel IDE port.

   On-Chip SATA
    ▶▶ Disabled   Disable onboard Seria ATA function.
    ▶▶ Auto   When there is no device to be plugged in IDE1 or IDE2, SATA controller will
                        remap to IDE controller. (Default value)
    ▶▶ Manual   Set SATA mode manually from "SATA Port0 configure as" item.

   SATA Port0 configure as
    ▶▶ IDE Pri. Master Set SATA controller to compatible mode. This mode will remap SATA Port 0
                        to IDE Primary Master.
    ▶▶ IDE Pri. Slave   Set SATA controller to compatible mode. This mode will remap SATA Port 0
                        to IDE Primary Slave.
    ▶▶ IDE Sec. Master Set SATA controller to compatible mode. This mode will remap SATA Port 0
                        to IDE Secondary Master.
    ▶▶ IDE Sec. Slave   Set SATA controller to compatible mode. This mode will remap SATA Port 0
                        to IDE Secondary Slave.
    ▶▶ SATA Port0   Set SATA controller to native mode(Serial ATA mode - SATA Port 0). This
                        mode is only supported by Windows XP or later. (Default value)
    ▶▶ SATA Port1   Set SATA controller to native mode(Serial ATA mode - SATA Port 1). This
                        mode is only supported by Windows XP or later.

☞ **SATA Port1 configure as**
  ▶▶ The setting depends on "SATA Port0 configure as" item setting. (Default: SATA Port1)

☞ **USB Controller**
  ▶▶ Enabled   Enable USB controller. (Default value)
  ▶▶ Disabled   Disable USB controller.

☞ **USB 2.0 Controller**
  You can disable this function if you are not using onboard USB 2.0 feature.
  ▶▶ Enabled   Enable USB 2.0 controller. (Default value)
  ▶▶ Disabled   Disable USB 2.0 controller.

☞ **USB Keyboard Support**
  ▶▶ Enabled   Enable USB keyboard support.
  ▶▶ Disabled   Disable USB keyboard support. (Default value)

☞ **USB Mouse Support**
  ▶▶ Enabled   Enable USB mouse support.
  ▶▶ Disabled   Disable USB mouse support. (Default value)

☞ **Legacy USB storage detect**
  ▶▶ Enabled   Enable USB storage detect function. (Default value)
  ▶▶ Disabled   Disable this function.

☞ **AC97 Audio**
  ▶▶ Auto   Enable onboard AC'97 audio function. (Default value)
  ▶▶ Disabled   Disable this function.

☞ **Onboard H/W LAN**
  ▶▶ Enabled   Enable onboard H/W LAN function. (Default value)
  ▶▶ Disabled   Disable this function.

☞ **OnBoard LAN Boot ROM**
  This function decide whether to invoke the boot ROM of the onboard LAN chip.
  ▶▶ Enabled   Enable this function.
  ▶▶ Disabled   Disable this function. (Default value)

☞ **Onboard Serial Port 1**
  ▶▶ Auto   BIOS will automatically setup the Serial port 1 address.
  ▶▶ 3F8/IRQ4   Enable onboard Serial port 1 and address is 3F8. (Default value)
  ▶▶ 2F8/IRQ3   Enable onboard Serial port 1 and address is 2F8.
  ▶▶ 3E8/IRQ4   Enable onboard Serial port 1 and address is 3E8.
  ▶▶ 2E8/IRQ3   Enable onboard Serial port 1 and address is 2E8.
  ▶▶ Disabled   Disable onboard Serial port 1.

☞ **Onboard Serial Port 2**
  ▶▶ Auto   BIOS will automatically setup the port 1 address.
  ▶▶ 3F8/IRQ4   Enable onboard Serial port 2 and address is 3F8.
  ▶▶ 2F8/IRQ3   Enable onboard Serial port 2 and address is 2F8. (Default value)
  ▶▶ 3E8/IRQ4   Enable onboard Serial port 2 and address is 3E8.
  ▶▶ 2E8/IRQ3   Enable onboard Serial port 2 and address is 2E8.
  ▶▶ Disabled   Disable onboard Serial port 2.

 Onboard Parallel Port
   ▶ Disabled   Disable onboard LPT port.
   ▶ 378/IRQ7   Enable onboard LPT port and address is 378/IRQ7. (Default value)
   ▶ 278/IRQ5   Enable onboard LPT port and address is 278/IRQ5.
   ▶ 3BC/IRQ7   Enable onboard LPT port and address is 3BC/IRQ7.

 Parallel Port Mode
   ▶ SPP   Using Parallel port as Standard Parallel Port. (Default value)
   ▶ EPP   Using Parallel port as Enhanced Parallel Port.
   ▶ ECP   Using Parallel port as Extended Capabilities Port.
   ▶ ECP+EPP   Using Parallel port as ECP and EPP mode.

 ECP Mode Use DMA
   ▶ 3   Set ECP Mode Use DMA to 3. (Default value)
   ▶ 1   Set ECP Mode Use DMA to 1.

2-4 Power Management Setup

```

⌐ **ACPI Suspend Type**
  ▶ S1(POS)   Set ACPI suspend type to S1/POS(Power On Suspend). (Default value)
  ▶ S3(STR)   Set ACPI suspend type to S3/STR(Suspend To RAM).

⌐ **Power LED in S1 state**
  ▶ Blinking   In standby mode(S1), poer LED will blink. (Default value)
  ▶ Dual/OFF   In standby mode(S1):
                  a. If use single color LED, power LED will turn off.
                  b. If use dual color LED, power LED will turn to another color.

⌐ **Off by Power button**
  ▶ Instant-off   Press power button then Power off instantly. (Default value)
  ▶ Delay 4 Sec.   Press power button 4 sec. to Power off. Enter suspend if button is pressed less
                   than 4 seconds.

⌐ **PME Event Wake Up**
  This feature requires an ATX power supply that provides at least 1A on the 5VSB lead.
  ▶ Disabled   Disable this function.
  ▶ Enabled   Enable PME as wake up event. (Default value)

⌐ **ModemRingOn/WakeOnLan**
  An incoming call via modem can awake the system from any suspend state or an input signal
  comes from the other client server on the LAN can awake the system from any suspend state.
  ▶ Disabled   Disable Modem Ring On / Wake On LAN function.
  ▶ Enabled   Enable Modem Ring On / Wake On LAN function. (Default value)

☞ **Resume by Alarm**

You can set "Resume by Alarm" item to enabled and key in Date/Time to power on system.
▶▶ Disabled   Disable this function. (Default value)
▶▶ Enabled   Enable alarm function to POWER ON system.

If Resume by Alarm is Enabled.
▶▶ Date (of Month) Alarm :   Everyday, 1~31
▶▶ Time (hh: mm: ss) Alarm : (0~23) : (0~59) : (0~59)

☞ **Power On By Mouse**
▶▶ Disabled   Disabled this function. (Default value)
▶▶ Double Click   Double click on PS/2 mouse left button to power on the system.

☞ **Power On By Keyboard**
▶▶ Disabled   Disabled this function. (Default value)
▶▶ Password   Enter from 1 to 5 characters to set the keyboard power on password.
▶▶ Keyboard 98 If your keyboard have "POWER Key" button, you can press the key to power
                  on the system.

☞ **KB Power ON Password**
When "Power On by Keyboard" set at Password, you can set the password here.
▶▶ Enter   Input password(from 1 to 5 characters) and press Enter to set the password.

☞ **AC BACK Function**
▶▶ Soft-Off   When AC-power back to the system, the system will be in "Off" state.
               (Default value)
▶▶ Full-On   When AC-power back to the system, the system always in "On" state.

2-5 PnP/PCI Configurations

```
                    CMOS Setup Utility-Copyright (C) 1984-2006 Award Software

    PCI1/PCI5 IRQ Assignment               [Auto]                        Item Help
    PCI2 IRQ Assignment                    [Auto]              Menu Level▶
    PCI3 IRQ Assignment                    [Auto]
    PCI4 IRQ Assignment                    [Auto]              Device(s) using this
                                                               INT:

  ↑↓→←: Move      Enter: Select     +/-/PU/PD: Value    F10: Save    ESC: Exit      F1: General Help
      F5: Previous Values             F6: Fail-Safe Default          F7: Optimized Defaults
```

   PCI1/PCI5 IRQ Assignment

     ▸ Auto   Auto assign IRQ to PCI1/PCI5. (Default value)

     ▸ 3,4,5,7,9,10,11,12,14,15   Set IRQ 3,4,5,7,9,10,11,12,14,15 to PCI1/PCI5.

   PCI2 IRQ Assignment

     ▸ Auto   Auto assign IRQ to PCI2. (Default value)

     ▸ 3,4,5,7,9,10,11,12,14,15   Set IRQ 3,4,5,7,9,10,11,12,14,15 to PCI2.

   PCI3 IRQ Assignment

     ▸ Auto   Auto assign IRQ to PCI3. (Default value)

     ▸ 3,4,5,7,9,10,11,12,14,15   Set IRQ 3,4,5,7,9,10,11,12,14,15 to PCI3.

   PCI4 IRQ Assignment

     ▸ Auto   Auto assign IRQ to PCI4. (Default value)

     ▸ 3,4,5,7,9,10,11,12,14,15   Set IRQ 3,4,5,7,9,10,11,12,14,15 to PCI4.

2-6   PC Health Status

```
              CMOS Setup Utility-Copyright (C) 1984-2006 Award Software
                                    PC Health Status
 Reset Case Open Status              [Disabled]                      Item Help
 Case Opened                        No                          Menu Level▶
 Vcore                              OK
 DDR25V                             OK
 +3.3V                              OK
 +12V                               OK
 Current CPU Temperature            45ºC
 Current CPU FAN Speed              3245 RPM
 Current SYSTEM FAN Speed           0     RPM
 CPU Warning Temperature            [Disabled]
 CPU FAN Fail Warning               [Disabled]
 SYSTEM FAN Fail Warning            [Disabled]
 CPU Smart FAN Control              [Enabled]
 CPU Smart FAN Mode                 [Auto]

 ↑↓→←: Move      Enter: Select       +/-/PU/PD: Value    F10: Save    ESC: Exit     F1: General Help
       F5: Previous Values           F6: Fail-Safe Defaults  F7: Optimized Defaults
```

☞ **Reset Case Open Status**
   ▶ Disabled   Don't reset case open status. (Default value)
   ▶ Enabled   Clear case open status at next boot.

☞ **Case Opened**
   If the case is closed, "Case Opened" will show "No".
   If the case have been opened, "Case Opened" will show "Yes".
   If you want to reset "Case Opened" value, set "Reset Case Open Status" to "Enabled" and save
   CMOS, your computer will restart.

☞ **Current Voltage(V) Vcore / DDR25V / +3.3V / +12V**
   ▶ Detect system's voltage status automatically.

☞ **Current CPU Temperature**
   ▶ Detect CPU temperature automatically.

☞ **Current CPU/SYSTEM FAN Speed (RPM)**
   ▶ Detect CPU/SYSTEM Fan speed status automatically.

☞ **CPU Warning Temperature**
   ▶ 60ºC / 140ºF   Monitor CPU temperature at 60ºC / 140ºF.
   ▶ 70ºC / 158ºF   Monitor CPU temperature at 70ºC / 158ºF.
   ▶ 80ºC / 176ºF   Monitor CPU temperature at 80ºC / 176ºF.
   ▶ 90ºC / 194ºF   Monitor CPU temperature at 90ºC / 194ºF.
   ▶ Disabled   Disable this function. (Default value)

☞ **CPU/SYSTEM FAN Fail Warning**
   ▶ Disabled   Fan warning function disable. (Default value)
   ▶ Enabled   Fan warning function enable.

GA-8I865G775-G(-RH) Motherboard   - 44 -

○ **CPU Smart FAN Control**
  ▶ Disabled   Disable this function.
  ▶ Enabled   When this function is enabled, CPU fan will run at different speed depending on CPU temperature. Users can adjust the fan speed with Easy Tune based on their requirements. (Default Value)

○ **CPU Smart FAN Mode**
  This option is available only when CPU Smart FAN Control is enabled.
  ▶ Auto   BIOS autodetects the type of CPU fan you installed and sets the optimal CPU Smart FAN control mode for it. (Default Value)
  ▶ Voltage   Set to Voltage when you use a CPU fan with a 3-pin fan power cable.
  ▶ PWM   Set to PWM when you use a CPU fan with a 4-pin fan power cable.
  Note: In fact, the Voltage option can be used for CPU fans with 3-pin or 4-pin power cables. However, some 4-pin CPU fan power cables are not designed following Intel 4-Wire fans PWM control specifications. With such CPU fans, selecting PWM will not effectively reduce the fan speed.

2-7 MB Intelligent Tweaker(M.I.T.)

```
                     CMOS Setup Utility-Copyright (C) 1984-2006 Award Software
                                MB Intelligent Tweaker(M.I.T.)
    CPU Clock Ratio (Note)                      [18X]                     Item Help
    CPU Host Clock Control                       [Disabled]            Menu Level▶
  x CPU Host Frequency (Mhz)                     200
  x AGP/PCI/SRC Fixed                            66/33/100
    Memory Frequency For                         [Auto]
    Memory Frequency (Mhz)                       400
    AGP/PCI/SRC Frequency (Mhz)                  66/33/100

    AGP OverVoltage Control                      [Normal]
    FSB OverVoltage Control                      [Normal]
    CPU Voltage Control                          [Normal]
    Normal CPU Vcore                             1.3875V

  ↑↓→←: Move    Enter: Select      +/-/PU/PD: Value    F10: Save     ESC: Exit    F1: General Help
        F5: Previous Values             F6: Fail-Safe Defaults        F7: Optimized Defaults
```

⚠ **CAUTION**   Incorrect using these features may cause your system broken. For power end-user use only.

☞ **CPU Clock Ratio (Note)**

This setup option will automatically assign by CPU detection.

The option will display "Locked" and read only if the CPU ratio is not changeable.

☞ **CPU Host Clock Control**

Please note that if your system is overclocked and cannot restart, please wait 20secs.

for automatic system restart or clear the CMOS setup data and perform a safe restart.

▶ Disabled   Disable CPU Host Clock Control. (Default value)

▶ Enabled   Enable CPU Host Clock Control.

☞ **CPU Host Frequency (Mhz)**

▶ 100MHz ~ 355MHz   Set CPU Host Frequency from 100MHz to 355MHz.

If you use FSB533 Pentium 4 processor, please set "CPU Host Frequency" to 133MHz.If you use FSB800 Pentium 4 processor, please set "CPU Host Frequency" to 200MHz.

Incorrect using it may cause your system broken. For power End-User use only!

☞ **AGP/PCI/SRC Fixed**

This item will be available when "CPU Host Clock Control" is set to Enabled.

Serial ATA device is very sensitive to SRC clock. SRC over clock may make Serial ATA device function can't work properly.

▶ Adjust AGP/PCI/SRC clock asychrohous with CPU.

(Note)   This item will show up when you install a processor which supports this function.

GA-8I865G775-G(-RH) Motherboard   - 46 -

☞ **Memory Frequency For**
  Wrong frequency may make system can't boot, clear CMOS to overcome wrong frequency issue.
  for FSB(Front Side Bus) frequency=533MHz,
  ➡ 2.0   Memory Frequency = Host clock X 2.0.
  ➡ 2.5   Memory Frequency = Host clock X 2.5.
  ➡ Auto   Set Memory frequency by DRAM SPD data. (Default value)
  for FSB(Front Side Bus) frequency=800MHz,
  ➡ 2.0   Memory Frequency = Host clock X 2.0.
  ➡ 1.66   Memory Frequency = Host clock X 1.66.
  ➡ 1.33   Memory Frequency = Host clock X 1.33.
  ➡ Auto   Set Memory frequency by DRAM SPD data. (Default value)

☞ **Memory Frequency (Mhz)**
  The values depend on "CPU Host Frequency(Mhz)" item.

☞ **AGP/PCI/SRC Frequency (Mhz)**
  The values depend on AGP/PCI/SRC Fixed.

☞ **DIMM OverVoltage Control**
  Please note that by overclocking your system through the increase of the DIMM voltage, damage
  to the memory may occur.
  ➡ Normal   Set DIMM OverVoltage Control to Normal. (Default value)
  ➡ +0.1V   Set DIMM OverVoltage Control to +0.1V.
  ➡ +0.2V   Set DIMM OverVoltage Control to +0.2V.
  ➡ +0.3V   Set DIMM OverVoltage Control to +0.3V.
  ➡ +0.4V   Set DIMM OverVoltage Control to +0.4V.
  ➡ +0.5V   Set DIMM OverVoltage Control to +0.5V.
  ➡ +0.6V   Set DIMM OverVoltage Control to +0.6V.
  Incorrect using it may cause your system broken. For power End-User use only!

☞ **AGP OverVoltage Control**
  ➡ Normal   Set AGP OverVoltage Control to Normal. (Default value)
  ➡ +0.1V   Set AGP OverVoltage Control to +0.1V.
  ➡ +0.2V   Set AGP OverVoltage Control to +0.2V.
  ➡ +0.3V   Set AGP OverVoltage Control to +0.3V.
  Increase AGP voltage may get stable for Over_Clock. But it may damage to AGP Card when
  enable this feature.

☞ **FSB OverVoltage Control**
  ➡ Normal   Set FSB OverVoltage Control to Normal. (Default value)
  ➡ +0.1V   Set FSB OverVoltage Control to +0.1V.
  ➡ +0.2V   Set FSB OverVoltage Control to +0.2V.
  ➡ +0.3V   Set FSB OverVoltage Control to +0.3V.

☞ **CPU Voltage Control**
  ➡ Supports adjustable CPU Vcore from 0.8375V to 1.6000V. (Default value: Normal)

☞ **Normal CPU Vcore**
  Display your CPU Vcore Voltage.

2-8　Load Fail-Safe Defaults

CMOS Setup Utility-Copyright (C) 1984-2006 Award Software	
▶　Standard CMOS Features	Load Fail-Safe Defaults
▶　Advanced BIOS Features	Load Optimized Defaults
▶　Integrated Peripherals	Set Supervisor Password
▶　Power Ma~~nagement Setup~~	~~Set User Password~~
▶　PnP/PCI C　　　Load Fail-Safe Defaults (Y/N)? N	
▶　PC Health Status	~~Exit Without Saving~~
▶　MB Intelligent Tweaker(M.I.T.)	
ESC: Quit	↑↓→←: Select Item
F8: Q-Flash	F10: Save & Exit Setup
Load Fail-Safe Defaults	

Fail-Safe defaults contain the most appropriate values of the system parameters that allow minimum system performance.

2-9　Load Optimized Defaults

CMOS Setup Utility-Copyright (C) 1984-2006 Award Software	
▶　Standard CMOS Features	Load Fail-Safe Defaults
▶　Advanced BIOS Features	Load Optimized Defaults
▶　Integrated Peripherals	Set Supervisor Password
▶　Power Ma~~nagement Setup~~	~~Set User Password~~
▶　PnP/PCI C　　　Load Optimized Defaults (Y/N)? N	
▶　PC Health Status	~~Exit Without Saving~~
▶　MB Intelligent Tweaker(M.I.T.)	
ESC: Quit	↑↓→←: Select Item
F8: Q-Flash	F10: Save & Exit Setup
Load Optimized Defaults	

Selecting this field loads the factory defaults for BIOS and Chipset Features which the system automatically detects.

2-10   Set Supervisor/User Password

```
CMOS Setup Utility-Copyright (C) 1984-2006 Award Software

    ▶  Standard CMOS Features              Load Fail-Safe Defaults
    ▶  Advanced BIOS Features              Load Optimized Defaults
    ▶  Integrated Peripherals              Set Supervisor Password
    ▶  Power Management Setup              Set User Password
    ▶  PnP/PCI C        Enter Password:
    ▶  PC Health                           Exit Without Saving
    ▶  MB Intelligent Tweaker(M.I.T.)

    ESC: Quit                             ↑↓→←: Select Item
    F8: Q-Flash                           F10: Save & Exit Setup

                        Change/Set/Disable Password
```

When you select this function, the following message will appear at the center of the screen to assist you in creating a password.

Type the password, up to eight characters, and press <Enter>. You will be asked to confirm the password. Type the password again and press <Enter>. You may also press <Esc> to abort the selection and not enter a password.

To disable password, just press <Enter> when you are prompted to enter password. A message "PASSWORD DISABLED" will appear to confirm the password being disabled. Once the password is disabled, the system will boot and you can enter Setup freely.

The BIOS Setup program allows you to specify two separate passwords:

SUPERVISOR PASSWORD and a USER PASSWORD. When disabled, anyone may access all BIOS Setup program function. When enabled, the Supervisor password is required for entering the BIOS Setup program and having full configuration fields, the User password is required to access only basic items.

If you select "System" at "Password Check" in Advance BIOS Features Menu, you will be prompted for the password every time the system is rebooted or any time you try to enter Setup Menu.

If you select "Setup" at "Password Check" in Advance BIOS Features Menu, you will be prompted only when you try to enter Setup.

2-11   Save & Exit Setup

```
CMOS Setup Utility-Copyright (C) 1984-2006 Award Software
 ▶   Standard CMOS Features              Load Fail-Safe Defaults
 ▶   Advanced BIOS Features              Load Optimized Defaults
 ▶   Integrated Peripherals              Set Supervisor Password
 ▶   Power Management Setup              Set User Password
 ▶   PnP/PCI Configurations              Save & Exit Setup
 ▶   PC Health           Save to CMOS and EXIT (Y/N)? Y
 ▶   MB Intelligent Tweaker(M.I.T.)

 ESC: Quit                              ↑↓→←: Select Item
 F8: Q-Flash                            F10: Save & Exit Setup
                       Save Data to CMOS
```

Type "Y" will quit the Setup Utility and save the user setup value to RTC CMOS.
Type "N" will return to Setup Utility.

2-12   Exit Without Saving

```
CMOS Setup Utility-Copyright (C) 1984-2006 Award Software
 ▶   Standard CMOS Features              Load Fail-Safe Defaults
 ▶   Advanced BIOS Features              Load Optimized Defaults
 ▶   Integrated Peripherals              Set Supervisor Password
 ▶   Power Management Setup              Set User Password
 ▶   PnP/PCI C          Quit Without Saving (Y/N)? N
 ▶   PC Health Status                   Exit Without Saving
 ▶   MB Intelligent Tweaker(M.I.T.)

 ESC: Quit                              ↑↓→←: Select Item
 F8: Q-Flash                            F10: Save & Exit Setup
                       Abandon all Data
```

Type "Y" will quit the Setup Utility without saving to RTC CMOS.
Type "N" will return to Setup Utility.

Chapter 3 Drivers Installation

NOTE

Pictures below are shown in Windows XP.

(1) Please make sure to install the latest service pack for Windows after OS installation and before installing motherboard drivers.

(2) Insert the driver CD that came with your motherboard into your CD-ROM drive, the driver CD will auto start and installation screen will appear. If not, please double click the CD-ROM device icon in **My computer** or execute the Setup.exe in the root directory of the driver CD.

3-1   Install Chipset Drivers

After insert the driver CD, "Xpress Install" will scan automatically the system and then list all the drivers that recommended to install. The "Xpress Install" uses the"Click and Go" technology to install the drivers automatically. Just select the drivers you want then click the "GO" button. The "Xpress Install" will execute the installation for you automatically.

NOTE

Some device drivers will restart your system automatically. After restarting your system the "Xpress Install" will continue to install other drivers.

System will reboot automatically after install the drivers, afterward you can install others application.

CAUTION

For USB2.0 driver support under Windows XP operating system, please use Windows Service Pack. After install Windows Service Pack, it will show a question mark "?" in "Universal Serial Bus controller" under "Device Manager". Please remove the question mark and restart the system (System will auto-detect the right USB2.0 driver).

3-2 Software Applications

This page displays all the tools that Gigabyte developed and some free software. You can click an item to install it.

3-3 Driver CD Information

This page lists the contents of software and drivers in this CD-title.

3-4 Hardware Information

This page lists all device you have for this motherboard.

3-5 Contact Us

You can also see the last page of this manual for contacts information details.

Chapter 4 Appendix

4-1   Unique Software Utilities

(Not all model support these Unique Software Utilities, please check your MB features.)

4-1-1   EasyTune 5 Introduction

EasyTune 5 presents the most convenient Windows based system performance enhancement and manageability utility. Featuring several powerful yet easy to use tools such as 1) Overclocking for enhancing system performance, 2) C.I.A. and M.I.B. for special enhancement for CPU and Memory, 3) Smart-Fan control for managing fan speed control of both CPU cooling fan and North-Bridge Chipset cooling fan, 4) PC health for monitoring system status.(Note)

User Interface Overview

	Button / Display	Description
1.	Overclocking	Enters the Overclocking setting page
2.	C.I.A./C.I.A.2 and M.I.B./M.I.B.2	Enters the C.I.A./2 and M.I.B./2 setting page
3.	Smart-Fan	Enters the Smart-Fan setting page
4.	PC Health	Enters the PC Health setting page
5.	GO	Confirmation and Execution button
6.	"Easy Mode" & "Advance Mode"	Toggles between Easy and Advance Mode
7.	Display screen	Display panel of CPU frequency
8.	Function display LEDs	Shows the current functions status
9.	GIGABYTE Logo	Log on to GIGABYTE website
10.	Help button	Display EasyTune™ 5 Help file
11.	Exit or Minimize button	Quit or Minimize EasyTune™ 5 software

(Note)   EasyTune 5 functions may vary depending on different motherboards.

4-1-2 Xpress Recovery2 Introduction

Xpress Recovery2 is designed to provide quick backup and restoration of hard disk data. Supporting Microsoft operating systems including Windows XP/2000/NT/98/Me and DOS, and file systems including FAT16, FAT32, and NTFS, Xpress Recovery2 is able to back up data on hard disks on PATA and SATA IDE controllers. After Xpress Recovery2 is executed from CD-ROM for the first time, it will stay permanent in your hard disk. If you wish to run Xpress Recovery2 later, you can simply press F9 during system bootup to enter Xpress Recovery2 without the CD-ROM.

System requirements:

1. Intel x86 platforms
2. At least 64M bytes of system memory
3. VESA-supported VGA cards

How to use the Xpress Recovery2

Initial access by booting from CD-ROM and subsequent access by pressing the F9 key:

Steps: After entering BIOS Setup, go to **Advanced BIOS Feature** and set to boot from CD-ROM. Save the settings and exit the BIOS Setup. Insert the provided driver CD into your CD-ROM drive. Upon system restart, the message which says "Boot from CD/DVD:" will appear in the bottom left corner of the screen. Press any key to enter Xpress Recovery2.

After the steps above are completed, subsequent access to Xpress Recovery2 can be made by simply pressing the <F9> key during system power-on.

Boot from CD/DVD:

<F9> Xpress Recovery2

<table>
<tr>
<td>NOTE</td>
<td>
1. If you have already entered Xpress Recovery2 by booting from the CD-ROM, you can enter Xpress Recovery2 by pressing the <F9> key in the future.
2. System storage capacity and the reading/writing speed of the hard disk will affect the data backup speed.
3. It is recommended that Xpress Recovery2 be immediately installed once you complete installations of OS and all required drivers as well as software.
</td>
</tr>
</table>

The Main Screen of Xpress Recovery2

1. RESTORE:

Restore the backed-up data to your hard disk.
(This button will not appear if there is no backup file.)

2. BACKUP:

Back up data from hard disk.

3. REMOVE:

Remove previously-created backup files to release disk space.
(This button will not appear if there is no backup file.)

4. REBOOT:

Exit the main screen and restart the system.

Limitations:

1. Not compatible to Xpress Recovery.
2. For the use of Xpress Recovery2, a primary partition must be reserved.
3. Xpress Recovery2 will store the backup file at the end of the hard disk, so free space available on the hard disk for the backup file must be allocated in advance. (A minimum 4GB is recommended but the actual space is dependent on the size of the data to be backed up)
4. Capable of backing up hard disks installed with Windows operating systems including DOS and Windows XP/2000/NT/9x/Me.
5. USB hard disks are currently not supported.
6. Does not support RAID/AHCI (class code 0104/0106) hard disks.
7. Capable of backing up and restoring only the first physical hard disk.

Hard disks detection sequence is as follows:

    a. PATA IDE primary channel
    b. PATA IDE secondary channel
    c. SATA IDE channel 1
    d. SATA IDE channel 2
    e. SATA IDE channel 3
    f. SATA IDE channel 4

Precautions:

1. When using hard disks with more than 128G under Windows 2000, be sure to execute the EnableBigLba.*exe* program from the driver CD before data backup.
2. It is normal that data backup takes longer time than data restoration.
3. Xpress Recovery2 is compliant with the GPL regulations.
4. On a few motherboards based on Nvidia chipsets, BIOS update is required for Xpress Recovery2 to correctly identify RAID and SATA IDE mode. Please contact your motherboard manufacturer.

4-1-3 Flash BIOS Method Introduction

Method 1 : Q-Flash™ Utility

Q-Flash™ is a BIOS flash utility embedded in Flash ROM. With this utility, users only have to stay in the BIOS menu when they want to update BIOS. Q-Flash™ allows users to flash BIOS without any utility in DOS or Windows. Using Q-Flash™ indicating no more fooling around with any complicated instructions and operating system since it is in the BIOS menu.

> ⚠ **CAUTION**
> Please note that because updating BIOS has potential risk, please do it with caution!! We are sorry that Gigabyte Technology Co., Ltd is not responsible for damages of system because of incorrect manipulation of updating BIOS to avoid any claims from end-users.

Before You Begin:

Before you start updating BIOS with the Q-Flash™ utility, please follow the steps below first.

1. Download the latest BIOS for your motherboard from Gigabyte's website.
2. Extract the BIOS file downloaded and save the BIOS file (the one with model name.Fxx. For example, 8KNXPU.Fba) to a floppy disk.
3. Reboot your PC and press **Del** to enter BIOS menu.

The BIOS upgrading guides below are separated into two parts.
If your motherboard has dual-BIOS, please refer to **Part One**.
If your motherboard has single-BIOS, please refer to **Part Two**.

Part One:

Updating BIOS with Q-Flash™ Utility on Dual BIOS Motherboards.

Some of Gigabyte motherboards are equipped with dual BIOS. In the BIOS menu of the motherboards supporting Q-Flash and Dual BIOS, the Q-Flash utility and Dual BIOS utility are combined in the same screen. This section only deals with how to use Q-Flash utility.
In the following sections, we take GA-8KNXP Ultra as the example to guide you how to flash BIOS from an older version to the latest version. For example, from Fa3 to Fba.

The BIOS file is Fa3 before updating

```

Task menu for Dual BIOS utility:

Contains the names of eight tasks and two item showing information about the BIOS ROM type. Blocking a task and pressing Enter key on your keyboard to enable execution of the task.

Task menu for Q-Flash utility:

Contains the names of four tasks. Blocking a task and pressing Enter key on your keyboard to enable execution of the task.

Action bar:

Contains the names of four actions needed to operate the Q-Flash/Dual BIOS utility. Pressing the buttons mentioned on your keyboards to perform these actions.

Using the Q-Flash™ utility:

This section tells you how to update BIOS using the Q-Flash utility. As described in the "Before you begin" section above, you must prepare a floppy disk having the BIOS file for your motherboard and insert it to your computer. If you have already put the floppy disk into your system and have entered the Q-Flash utility, please follow the steps below to flash BIOS.

Steps:

1. Press arrow buttons on your keyboard to move the light bar to "Load Main BIOS from Floppy" item in the Q-Flash menu and press Enter button.

    Later, you will see a box pop up showing the BIOS files you previously downloaded to the floppy disk.
    NOTE — If you want to save the current BIOS for backup purpose, you can begin Step 1 with "Save Main BIOS to Floppy" item.

2. Move to the BIOS file you want to flash and press **Enter**.

    In this example, we only download one BIOS file to the floppy disk so only one BIOS file, 8KNXPU.Fba, is listed.

    CAUTION — Please confirm again you have the correct BIOS file for your motherboard.

6. Press Del to enter BIOS menu after system reboots and "Load BIOS Fail-Safe Defaults". See how to Load BIOS Fail-Safe Defaults, please kindly refer to Step 6 to 7 in **Part One**.

**Congratulation!! You have updated BIOS successfully!!**

Method 2 : @BIOS™ Utility

If you do not have a DOS startup disk, we recommend that you use the new @BIOS utility. @BIOS allows users to update their BIOS under Windows. Just select the desired @BIOS server to download the latest version of BIOS.

Fig 1. Installing the @BIOS utility

Select **@BIOS** item

Fig 2. Installation Complete and Run @BIOS

Click Sart/ Programs/ GIGABYTE/@BIOS

Fig 3. The @BIOS Utility

Click "✓"   Click "Update New BIOS"

Fig 4. Select the desired @BIOS server

1. Methods and steps:

    I. Update BIOS through Internet

        a.   Click "Internet Update" icon

        b.   Click "Update New BIOS" icon

        c.   Select @BIOSTM sever

        d.   Select the exact model name on your motherboard

        e.   System will automatically download and update the BIOS.

    II. Update BIOS NOT through Internet:

        a.   Do not click "Internet Update" icon

        b.   Click "Update New BIOS"

        c.   Please select "All Files" in dialog box while opening the old file.

        d.   Please search for BIOS unzip file, downloading from internet or any other methods (such as: 8I865G775-G.F1).

        e.   Complete update process following the instruction.

III. Save BIOS

In the very beginning, there is "Save Current BIOS" icon shown in dialog box. It means to save the current BIOS version.

IV. Check out supported motherboard and Flash ROM:

In the very beginning, there is "About this program" icon shown in dialog box. It can help you check out which kind of motherboard and which brand of Flash ROM are supported.

2. Note:

I.   In method I, if it shows two or more motherboard's model names to be selected, please make sure your motherboard's model name again. Selecting wrong model name will cause the system unbooted.

II. In method II, be sure that motherboard's model name in BIOS unzip file are the same as your motherboard's. Otherwise, your system won't boot.

III. In method I, if the BIOS file you need cannot be found in @BIOS™ server, please go onto Gigabyte's web site for downloading and updating it according to method II.

IV. Please note that any interruption during updating will cause system unbooted.

V.   Do not use @BIOS and C.O.M. (Corporate Online Management) at the same time.
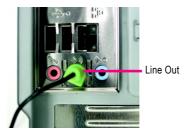

4-1-4   2 / 4 / 6 Channel Audio Function Introduction

2 Channel Audio Setup

We recommend that you use speakers with amplifier to get the best sound effect if the stereo output is applied.

STEP 1:
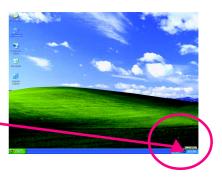

Connect the stereo speakers or earphone to "Line Out."

Line Out

STEP 2:

After installing the audio driver, you'll find a Sound Effect icon on the lower right hand taskbar. Click the icon to select the function.

STEP 3:

On the AC97 Audio Configuration menu, click the **Speaker Configuration** tab and select the **2 channel mode for stereo speaker output** check box.

4 Channel Analog Audio Output Mode

STEP 1:
Connect the front channels to "Line Out,"
the rear channels to "Line In."

Line Out

Line In

STEP 2:
After installing the audio driver, you'll find a Sound
Effect icon on the lower right hand taskbar. Click
the icon to select the function.

STEP 3:
On the AC97 Audio Configuration menu, click the
Speaker Configuration tab and select the
4 channel mode for 4 speaker output check
box.
Clear the **Only SURROUND-KIT** check box and
press **OK.**
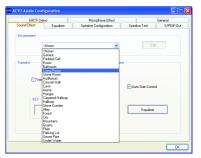

When the **Environment** setting is **None**, the sound
would be performed as stereo mode (2-channel
output). Please select other settings (ex: **Living
Room**) for 4-channel output.

Basic 6 Channel Analog Audio Output Mode

Use the back audio panel to connect the audio output without any additional module.
STEP 1:
Connect the front channels to "Line Out",the rear channels to "Line In", and the Center/Subwoofer channels to "MIC In".

Line In

MIC In   Line Out

STEP 2:
After installing the audio driver, you'll find a Sound Effect icon on the lower right hand taskbar. Click the icon to select the function.

STEP 3:
On the AC97 Audio Configuration menu, click the **Speaker Configuration** tab and select the **6 channel mode for 5.1 speaker output** check box.
Clear the **Only SURROUND-KIT** check box and press **OK.**

Advanced 6 Channel Analog Audio Output Mode (using Audio Combo Kit,Optional Device):
(Audio Combo Kit provides SPDIF output port : optical & coaxis and SURROUND-KIT : Rear R/L & CEN /Subwoofer)

SURROUND-KIT access analog output to rear channels and Center/Subwoofer channels. It is the best solution if you need 6 channel output, Line In and MIC at the same time. "SURROUND-KIT" is included in the GIGABYTE unique "Audio Combo Kit" as picture.

STEP 1:
Secure the metal bracket of the"Surround Kit" to the chassis back panel with a screw.

STEP 2:
Connect the "SURROUND-KIT" cable to the SUR_CEN connector on the M/B.

STEP 3:
Connect the front channels to back audio panel's "Line Out", the rear channels to SURROUND-KIT's REAR R/L, and the Center/Subwoofer channels to SURROUND-KIT's SUB CENTER.

GA-8I865G775-G(-RH) Motherboard   - 72 -

STEP 4:
After installing the audio driver, you'll find a Sound Effect icon on the lower right hand taskbar. Click the icon to select the function.
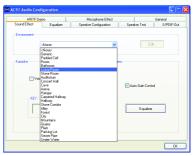

STEP 5:
On the AC97 Audio Configuration menu, click the **Speaker Configuration** tab and select the **6 channel mode for 5.1 speaker output** check box.
Select the **Only SURROUND-KIT** check box and press **OK.**

Basic & Advanced 6 Channel Analog Audio Output Mode Notes:

When the **Environment** setting is **None**, the sound would be performed as stereo mode (2-channel output). Please select the other settings for 6 channels output.

SPDIF Output Device (Optional Device)

A "SPDIF output" connector is available on the motherboard. Cable with rear bracket could link to the "SPDIF output" connector (As picture.) For the further linkage to decoder, rear bracket provides coaxial cable and Fiber connecting port.

STEP 1:
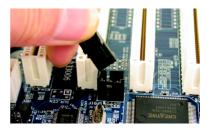

Secure the metal bracket of the SPDIF Output

device to the chassis back panel with a screw.

STEP 2:
Connect the SPDIF OUT device cable to the SPDIFO connector on the motherboard.

STEP 3:
Connect SPDIF to the SPDIF decoder.

4-2   Troubleshooting

Below is a collection of general asked questions. To check general asked questions based on a specific motherboard model, please log on to http://www.gigabyte.com.tw

Question 1: I cannot see some options that were included in previous BIOS after updating BIOS. Why?
Answer: Some advanced options are hidden in new BIOS version. Please press Ctrl and F1 keys after entering BIOS menu and you will be able to see these options.

Questions 2: Why is the light of my keyboard/optical mouse still on after computer shuts down?
Answer: In some boards, a small amount of electricity is kept on standby after computer shuts down and that's why the light is still on.

Question 3: How do I clear CMOS?
Answer: If your board has a Clear CMOS jumper, please refer to the Clear CMOS steps in the manual. If your board doesn't have such jumper, you can take off the on-board battery to leak voltage to clear CMOS. Please refer to the steps below:
   Steps:
   1.   Turn off power.
   2.   Disconnect the power cord from MB.
   3.   Take out the battery gently and put it aside for about 1 minute (Or you can use a metal object to connect the positive and negative pins in the battery holder to makethem short for 5 seconds).
   4.   Re-insert the battery to the battery holder.
   5.   Connect power cord to MB again and turn on power.
   6.   Press Del to enter BIOS and load Fail-Safe Defaults(or load Optimized Defaults).
   7.   Save changes and reboot the system.

Question 4: Why do I still get a weak sound after turning up the speaker to the maximum volume?
Answer: Please make sure the speaker you are using is equipped with an internal amplifier. If not, please change another speaker with power/amplifier and try again later.

Question 5: Sometimes I hear different continuous beeps from computer after system boots up. What do these beeps usually stand for?
Answer: The beep codes below may help you identify the possible computer problems. However, they are only for reference purposes. The situations might differ from case to case.

→   AWARD BIOS Beep Codes
    1 short: System boots successfully
    2 short: CMOS setting error
    1 long 1 short: DRAM or M/B error
    1 long 2 short: Monitor or display card error
    1 long 3 short: Keyboard error
    1 long 9 short: BIOS ROM error
    Continuous long beeps: DRAM error
    Continuous short beeps: Power error
